

AFTER VISIT SUMMARY

Nicolas Hernandez MRN: [REDACTED]38

10/16/2025 UCLA Ronald Reagan Emergency
Department 310-267-8400

Thank you for choosing UCLA Health for your care

Instructions

Emergency Department Discharge Instructions

Summary of your visit

- You have been evaluated in the UCLA Emergency Department today scooter accident.
- You were evaluated by the Emergency Medicine team and Trauma team.
- Your evaluation included a physical exam and CT scans of your brain, neck, which did not show evidence of acute injuries.
- **Our facial surgeons and orthopedic hand surgeons repaired your lacerations. Her x-ray was concerning for a fracture over your left hand for which we consulted our orthopedic hand surgery colleagues.**
- We have observed you in the ER and have determined that you are stable for discharge at this time.

Follow-Up

- Please follow up with your primary care physician within three days after being discharged from the ER to check on your symptoms. You will also need a referral to a hand specialist to have an appointment within the next week for further management of your fracture and laceration of your hand.

Return to the Emergency Department if you experience:

- Fevers 100.4 °F or greater
- Worsening or uncontrolled pain
- Persistent nausea and vomiting
- Chest pain or shortness of breath
- Numbness or weakness in your arms, legs, or groin
- Fainting or confusion
- Any other concerning symptoms

Thank you for choosing UCLA for your care. It was a pleasure taking part in your care today, and we wish you the best!

What's Next

You currently have no upcoming appointments scheduled.

UCLA Healthcare

Contact or return to the Emergency Department if your condition worsens or persists.

It is our goal to provide the best care possible and to exceed your expectations.

For information on obtaining copies of your medical records or X-rays, call Medical Correspondence at: (310) 825-6021 for Ronald Reagan Hospital; (424) 259-8045 for Santa Monica Hospital

Follow-up X-rays, Labs, Phone Calls:

Please make sure you have provided the best phone number to use to contact you. You may receive a live or automated call from us to check on your recovery and progress.

If you had an X-ray performed today, the X-ray was read by the Emergency Department doctor. A radiologist also reads this X-ray to provide a final interpretation. Some blood work that may have been performed may not have a result for 24-72 hours. If there is any significant change in your radiology interpretation or blood tests, we will contact you at the phone number you have provided us.

Medications:

If you received a prescription for medication(s) today, it is important when you fill this, you let the pharmacist know all the other medications that you are taking and any allergies you might have. It is also important that you notify your follow-up physician of all your medications, including the prescriptions you may receive today.

Financial Considerations:

We provide needed emergency care to everyone, regardless of ability to pay. If you have medical insurance, we will bill your insurance company. You will be billed directly for any unpaid balance or co-payments. You will receive at least two bills: the hospital bill, which will include an itemized statement of all hospital charges, including tests, X-rays and a hospital "treatment" charge, and a separate bill for the emergency physicians's services.

Driving Precautions:

[] While in the Emergency Medicine Center you received one or more medications that may impair your ability to drive. We recommend that you do not operate a motor vehicle for 12 hours.

SAFE PAIN MEDICINE PRESCRIBING IN EMERGENCY DEPARTMENTS

We care about you. Our goal is to treat your medical conditions, including pain, effectively, safely and in the right way.

Pain relief treatment can be complicated. Mistakes or abuse of pain medicine can cause serious health problems and death.

Our emergency department will only provide pain relief options that are safe and correct.
For your SAFETY, we follow these rules when helping you with your pain:

1. We look for and treat emergencies. We use our best judgment when treating pain. These recommendations follow legal and ethical advice.
2. You should have only ONE provider and ONE pharmacy helping you with pain. We do not usually prescribe pain medications if you already receive pain medicine from another health care provider.
3. If pain prescriptions are needed for pain, we will only give you a limited amount.
