

Alcohol Use Disorders Identification Test (AUDIT)

Alcohol can affect your health, medications, and treatment, so we ask patients the following questions. Your answers will remain confidential. Place an X or circle one response for each question. Think about your drinking in the past year. A drink means one beer (12 oz.), one glass of wine (5 oz.), or one mixed drink containing one shot (1.5oz.) of spirits.

Questions	0	1	2	3	4	5	6	Score
1. How often do you have a drink containing alcohol?	Never	Less than monthly	Monthly	Weekly	2-3 times a week	4-6 times a week	Daily

Total Score:								

(AUDIT) – Alcohol Use Disorders Identification Test – is a 10-item questionnaire that screens for hazardous or harmful alcohol consumption. Developed by the World Health Organization (WHO), the test correctly classifies 95% of people into either alcoholics or non-alcoholics. The AUDIT is particularly suitable for use in primary care settings and has been used with a variety of populations and cultural groups. It should be administered by a health professional or paraprofessional.

Scoring the AUDIT: Use the number at the top of the column (0-6) to total the individual's score. For each item selected assign it the necessary points (from the top column) and total those for the final score.
